retreat

Scandinavia has a word for it that can't be translated, but the meaning is universal... the craving for a favorite sweater, a soft blanket, and a cozy place to sink into. As the weather gets colder and the days get shorter, we yearn to create a nurturing nest... the place we go to watch the game, sip a cup of tea, and cry during an old movie. After braving the battles of the day we look to our homes as a retreat from the world around us.
